

Table 2 Information and Acknowledgement

Symbols, names and values marked with * are new since B810 was published in the year 2000 or are values that were revised to reflect current conditions. This table replaces Table 2 in Bulletin 810. Duplicate IL Map Symbols are in bold typeface and highlighted. Use the appropriate soil type name to determine the proper productivity index. Soils highlighted in green were added or changed during 2007.

Acknowledgement: Soil productivity indices and other required data for each Illinois soil were transferred to this web site. From 1996 to present, the Illinois crop yields estimates and productivity indices by soil type were created by a University of Illinois Urbana-Champaign, College of Agricultural, Consumer and Environmental Sciences task force of soil scientists, agronomists, crop scientists and agricultural economists under the direction of Dr. Kenneth R. Olson, Professor of Soil Science in the Department of NRES. The soil productivity indices for average management (B810) is maintained at the following NRES web site: <http://www.nres.uiuc.edu/soilproductivity>
